Identification of Microscope Parts

Obtain a compound light microscope from the storage area, and place it securely on the lab table. Identify the parts listed on the handouts. Fill in the blanks in the figure below with the microscope, and the blanks on the list of parts. When finished check your answers by comparing with a key provided by the instructor. Study the correct answers so that you can answer a short quiz with the correct answers (selected microscope parts). When you think you are ready, submit both handouts with the correct answers filled in. Then pick up the lab quiz. Identify the selected parts.
